CAREER OBJECTIVE

To secure a challenging position as a PHP Laravel Developer where I can contribute to dynamic web and mobile application projects. Leveraging my skills in PHP, Laravel, Android, and Flutter, I aim to build scalable solutions while continuously growing as a full-stack developer.

PROJECTS

Job Portal Website

Developed a dynamic job portal website using PHP Laravel, enabling job seekers and employers to connect seamlessly.

Fake Data Generator (Android App)

Tech Stack : Java, iText, Material Components.
Designed and developed an Android app that generates fake data for testing purposes. Integrated export features to PDF and CSV, implemented Material Design UI, and ensured unique file handling.

Cricket Scoring Application)

Tech Stack : Flutter, GetX.
Developed a dynamic scoring application using Flutter, enabling seamless real-time score tracking for cricket.

INTERNSHIPS

Bytesbizz Technology LLP   5-MAY-25 TO 5-JUNE-25

Completed an internship in PHP Laravel at Bytesbizz Technology LLP, focusing on web application development.

Avance Healthcare Pvt   12-DEC-24 TO 23-DEC-24

Successfully completed the Data scientist Internship, demonstrating a strong understanding of Data Mining fundamentals and problem-solving skills.
